### DDG BONDTECH FOR ULTIMAKER 2+

DDG Extruder for Ultimaker2 that feeds filament without grinding and with a very firm grip of the filament that will allow for faster printing without under-extrusion problems. Fantastic new product, signed Martin Bond.

We are now proud to present Bondtech`s latest development, DDG Extruder for Ultimaker2 that feeds filament without grinding and with a very firm grip of the filament that will allow for faster printing without under-extrusion problems and also high retraction prints like Voroni models without grinding.

- Strong housing parts in SLS Nylon in black colour
- Bondtech precision cnc machined gears in hardend steel.
- New driveshaft in cnc machined stainless steel
- New bearings

Parts re-used from Ultimaker 2+ Feeder

- Big plastic gear
- Pushfit connector + bowden clip
- Screws (4x M3x16)
- Filament inlet guide
- Compression spring assembly

This extruder re-uses parts from the Ultimaker2+ feeder (Used on Ultimaker 2+, Ultimaker 2+ Extended, Ultimaker 3, Ultimaker 3 Extended).

**If you do not have an Ultimaker 2+ feeder you will not be able to use this extruder.**

The original stepper motor of the printer will be reused and the extruder will be mounted at the same position and in the same mounting holes as the factory extruder making the installation easy and fast.

Installs in about 20 minutes.

E-steps needs to be updated to 311

Firmware available for Ultimaker 2, Ultimaker 2 Extended, Ultimaker2+, Ultimaker2+ Extended.

This extruder is developed together with C.Matthes in Germany

**BONDTECH QR2 EXTRUDER**

EXTRUDER for UM2 +/- . With Matchless Block V3 we obtain 60 cub. mm plastic/sec. This is 8 x standard UM2. "A 16 h... INCLUDES TRACKING extra SHIPPING, so if you order anything else, tracking will be included! This item is HEAVY, it is

This kit gives you everything you need to upgrade your Ultimaker 2 series printer with the Bondtech QR extruder for 2... underextrusion and feeding problems and be able to print much faster with sustained quality. Choose Left or Right side installation, when looking from behind printer. This determines if you want to change the ol... If you choose to add another one, you can swap the bowden over.

Read this if you plan a full double rig:  
If you need double setup, you will also need Bowden w/clips, Pt100 Temp Sensor, Heater, Teflon, Steel Coupler V2 and... has a hole in the aluminium where the nozzle comes out, and hole in top head plastic assembly for a 2nd Bowden. If y... onwards), the main computer board cannot take a 2nd motor at the same time.  
This kit fits Ultimaker 2 Go, Ultimaker 2, Ultimaker 2 Extended, Ultimaker 2+, Ultimaker 2 Extended +

**UM2GO HEATED BED**

WOW! Heated Bed for Um2Go! Brings the bed to 110C and the print head to 290C, if you need. No more trouble getting stuff to stick! This is one of our coolest upgrades!

If you have a Um2Go, you will wonder how you "did it" before, after this upgrade. Prints until 290C !! This is a heated bed upgrade for UM2, without the need to change the powersupply! The kit contains a custom silicon heater pad with a sticky side provided by 3M. You place it under the aluminium bed. The kit also contains a custom heater for the hot end. Without a new heater the heated bed will not work. Warning: you must download and install new firmware (using Cura), for this upgrade to work, You can actually install it without the upgrade, but you must NOT turn on the bed before doing the firmware upgrade. Instructions and firmware: <http://gr5.org/hb/>
