UM2 Nozzles 1

UM2 NOZZLES

UM2+ EVERLAST DIAMOND NOZZLE

DIAMOND tipped nozzle. We are supplying this nozzle to a German university. **Diamond** has exceptional thermal properties, far outshining any other known mineral or metal.

World's fastest and biggest
3D Solex WORLD CLASS

MATCHLESS

These nozzles will allow you to print spool after spool of ANY material. Our clients appreciate the following two features:

- 1) The tip will never wear out from printing
- 2) The tip is always "hot", so releases filaments better than any other nozzle.

There is a 1 year guarantee on this nozzle.

- 1) If it clogs up, we fix it.
- 2) If the tip wears out, you get a new nozzle.

This nozzle is built with our patented MATCHLESS technology. These parts inside the nozzle will wear out.

The guarantee cannot cover this worn out mechanism. In the event that you should irreversibly clog this nozzle, we will restore the nozzle and remove the Matchless core. The nozzle will then behave like any ordinary nozzle; speed-wise. The diamond tip will still be hot.

We soon also have 0.50mm DIAMOND! This is perfect for architects and engineers, for a sometimes better "relation" to the slicer in a metric model. Example when walls are 0.50 mm, 1.0mm, and so on. We are making this nozzle for Google and are now adding it to our catalog, for you.

Printing Carbon Fibre on a standard nozzle will destroy it completely in a few hours, or less than 500g filament.

This nozzle can print all day long, month after month.

UM2+ 5- ICE NOZZLE KIT W/ 0.40 EVERLAST RUBY

This great kit consists of 5 nozzles, for the UM2+ / Matchless / Olsson / E3D:
0.25-0.40-0.60-0.80 ICE Brass nozzles + 0.40 Everlast Ruby

This great kit consists of 5 nozzles, for the UM2+ / Matchless / Olsson Block / E3D:
0.25-0.40-0.60-0.80 ICE Brass nozzles + 0.40 Everlast Ruby

All the nozzles are brass nozzles. Except for the EVERLAST Ruby 0.40, they are coated with a hard and slippery material which makes cleaning a lot easier, and helps preventing plastic stick and being carried around the print.

These nozzles are standard nozzles except the Everlast which has the "Matchless" design of heating the filament.

This enables higher printing speeds and / or lower temperature, which again helps against dripping.

The ICE nozzles look a bit irregular on the surface due to the treatment, but this quickly evens out and does not affect printing.

The nozzles have a run-in period of 2 hours at 200C-225C, to harden, tempering the surface.

After that they should be used at max 265C. Higher temperatures than 265C will destroy the treatment and the nozzle is the just like any other nozzle!

ONLY the Everlast is recommended for abrasive materials, the other nozzles will wear out quickly.

Weight 0.05 kg

ULTIMAKER Upgrades-3D Printer Nozzles

0.80 mm
Matchless RACE

UM2 0.80 MM MATCHLESS

Optimized for 3D Solex V3 Block. Backwards compatible with "Olsson Block". This high tech nozzle will significantly increase plastic output. Alternatively, you can print cooler!

- Prints up to 4 times faster.
- Prints cooler, - 5-15 deg Celcius.
- 100% drop-in backwards compatible with "Olsson Block".
- Matchless Race Technology prints up to 4 times faster then a standard nozzle of the same size.
- Chrome coated Brass. Makes for easier outside cleaning.
- Precision manufacture at an ISO 9001 certified facility.

Weight 3 kg
Dimensions 8 x 6 x 1 cm
Filament Size 1.75mm, 2.85mm

0.60 mm
Matchless RACE

UM2 0.60MM MATCHLESS

Optimized for 3D Solex V3 Block. Backwards compatible with "Olsson Block". This high tech nozzle will significantly increase plastic output, completing prints faster. Alternatively, you can print cooler!

- Prints up to 4 times faster than a standard 0,40mm nozzle.
- Prints cooler, - 5-15 deg Celcius.
- 100% drop-in backwards compatible with "Olsson Block".
- Matchless Race Technology prints up to 4 times faster then a standard nozzle of the same size.
- Chrome coated Brass. Makes for easier outside cleaning.
- Precision manufacture at an ISO 9001 certified facility.

**SS 50 "ICE" - 0.50MM NOZZLE**

Helps preventing PLA from sticking to your nozzle Will not carry blobs of PLA or any other filament around your print! Super easy [Cold Pull!](#)
0.50mm size can have an advantage with certain difficult, fibrous filaments, less clogging.
Lasts even longer than stainless steel nozzles. For some users it will "payback" after first use!
(Ill. image- actual image coming).
For UM2/ UM2+

This fantastic newly developed product by 3D Solex has a core of stainless steel and a multi-component molecularly interlocked tempered surface with 2 main advantages:

- 1) PLA (or any other filament we know of) simply refuses to stick to it.**
 - 2) Cold Pulls work so much better, the inside of the nozzle is "ICE" too.**
 - 3) Its surface is much more wear resistant than that of stainless steel, so it will last much longer printing abrasive filaments. Compared with brass, - it is in a class of its own.**
- It also works exceptionally well with chemically challenging chemicals, like glow, flexible materials, + many more. These are the three fantastic advantages of this nozzle.
Now blobs of filament will not be carried around and depositet on your print.
It still prints slower than a brass nozzle.
Downside: A stainless steel based nozzle will not allow you to print as fast as a brass one.
Use: Run-in period of 2 hours at max 220C. This hardens/temperes it, after that, Max temp 280C.
For UM2 w/Olsson Block UM2+, Matchless V3.
Much stronger than steel nozzle. Not as fast as a brass nozzle.

RSB "ICE" SURFACE NOZZLE 0.25-1.00

NEW Nozzle from 3D Solex!

Slippery "ICE" nozzle, with brass core. Optimized for surface prints. Max temp 275C. First 2 hours max 220C to temper the nozzle. Super Easy Cold-Pulls!

Has an outer geometry optimized for surfaces. This is a brass nozzle (excellent temperature properties) with a hard coating of a slippery "ICE" coating. This coating prevents hot plastic sticking to it! A super nozzle!

If you heat it to more than 275C, it destroys this function and the nozzle acts like a "normal" nozzle. IMPORTANT: This ICE nozzle looks like a (dark) steel nozzle, but it is a brass nozzle! This means it prints just like a standard brass nozzle (several times faster than steel nozzles). Fits UM2- UM2+, Olsson Block, Matchless V3

Weight N/A
Select Size (mm) 0.25, 0.40, 0.60, 0.80, 1.00

EVERLAST UM2+ NOZZLES 0.25-0.80 MM

Super hard and super fast nozzles for UM2+.

These nozzle will allow you to print spool after spool of Carbon Fibre, Bronzefill and other abrasive materials. They also leave a particularly beautiful print with PLA, ABS and other filaments. Printing Carbon Fibre on a standard nozzle will destroy it completely in a few hours, or less than 500g filament, but what is more, you will not be able to finish even one print if it is big enough! This nozzle can print all day long, week after week. Print at 5-15 degrees higher temperature (PLA). Many users experience that the EVERLAST "paid back" after 1 time use only!

Weight 0.02 kg
Choose Size (mm) 0.25, 0.40, 0.50, 0.60, 0.80, 1.20

ULTIMAKER Upgrades-3D Printer Nozzles

**0.15MM MICRO NOZZLE**

This is the World's 2.nd smallest Nozzle. They are individually drilled and checked, and very difficult to use.

For Experts Only. Needs geared feeder. (Bondtech, Iroberti/Meduz, UM2+).

YOU will NOT be able to use this item with an original UM2.

This is the World's 2.nd smallest 3d printer nozzle. They are individually drilled and checked, and extremely difficult to manufacture.

These are difficult to use, and we recommend that you can print with an 0.25 nozzle "blindfoldedly" before using this one. Prints at lower temp (190 - 205C), since the material stays long time inside. Do not change material type without "Cold Pulls" in between.

Use Cold Pull before and after every print. This cleans out the nozzle.

What is this nozzle used for?

- Kanji, Japanese art writing
- Custom PCB manufacture
- Miniature drone parts
- Miniature tools and gadgets
- Other use

World's smallest drill is made with our 0.25mm nozzle. The 0.15mm has the surface area (opening size) of only about 30% of a 0.25mm hole.

A 0.40mm nozzle has a 15 times higher plastic output than the 0.10mm 3D Solex Micro. This nozzle will not work with an ungeared feeder like UM2 (not "+"), or without a high tech feeder likte Bondtech. Made in Norway by hand, using a Swiss "drill" and German tools.
